b. *law* or *principle of continuity*: the principle that all change, sequence, or series in nature is continuous, and that nothing passes from one state to another *per saltum*.

The phrase originated with Leibnitz. In 1687 he laid down as a general principle, that where there is continuity between data, such that one case continually approaches and at length loses itself in another, there will be a corresponding continuity in results or properties. For example, it is a property of the ellipse that all rays from the one focus are reflected from the curve to the other; in tbe parabola all such rays reflected at the curve are parallel; if there be given a series of ellipses continually approaching the parabola by the continuous increase of distance between the foci, the focal radii of these will continuously approach the relation of parallelism, so as at length to differ from it by less than any assignable amount. This was according to Leibnitz 'a principle of general order', having its origin in the mathematical infinite, absolutely necessary in Geometry, but holding good also in Physics, because the Sovereign Wisdom, the source of all tbings, acts as a perfect Geometer, and according to a harmony tbat admits of no addition. In 1702 he referred to this principle as 'the law of continuity', and claimed that it operates in all natural phenomena; and in his *Nouveaux Essais*, he declared it to be part of his 'Law of Continuity' that everything in nature goes by degrees, and nothing *per saltum*.

contra-, *prefix.* The L. adv. and prep. *contrā* (see prec.) came to be used in composition; this use, rare in cl. L., was much extended in late L. and Romanic. In the modern Romanic langs., the prefix retains the L. form, except in Fr., where it has duly become *contre-*. In words taken into English from OF., this became COUNTER-, which is the predominant form of the prefix: *contre-* appears in a few non-naturalized words from modern French. But in words derived directly from L. or It., or formed after these, *contra-* is retained, with the following uses:

1. In L. *contrā*, construed adverbially with certain verbs, tended at length to be written in combination, as *contrā dīcere*, later *contrādīcere*, 'to speak on the opposite side', hence 'to speak in opposition (*to* a statement or person)', and so 'to contradict'; *contrā-pōnere* to place on the opposite side, to counterpose; *contrā-scrībere* to write opposite, to countersign; *contrā-venīre* to come in the opposite direction, oppose, whence to contravene. The later tendency has been to treat the prefix prepositionally, so making the compound transitive. Verbs and esp. verbal derivatives of this type are numerous in English: cf. *contra-acting, -distinguish, -divide, -colluctation, -rotation*, etc.

2. In late or med.L. *contra-* was used in prepositional combination with an object, as in *contrājūris* = Gr. *παράνομος*, contrary to law. This was much developed in Romanic, and extended to the formation of sbs., *e.g.* in 16th c. It. *contrabando* that which is against proclamation or statute, contraband, *contrapelo* what goes against the hair or grain, *contrastomaco*, etc. Eng. has several adjs. so formed, and some sbs., as *contra-civil, -focal, -rational, -regular, -scriptural, contraregularity*, etc.

3. *contra-* is used in Romanic to indicate a thing made or acting against, in opposition to, in reply to, or as a substitute for, another of the same kind. Probably these were orig. akin to class 1, but in course of time some of them tended to the notion of class 2: cf. 16th c. It. *contralettera* reply or opposition-letter, *contramuro* an opposition wall, *contramina* an opposition mine, *contrascarpa* a counterscarp, and many terms belonging to attack and defence; *contramaestro* the master's mate in a ship, *contratossico, contraveleno* counterpoison, antidote; cf. *contra-approach, -proposal, -remonstrance*, etc.; but the ordinary Eng. repr. is COUNTER.

4. In It. *contra* is used esp. in musical terms, perh. starting from *contrapunto* counterpoint (which in its general sense belonged to 2 or 3). Thus *contrabasso, contralto, contratenore*, parts marked on the stave alongside of (above or below) and opposite to the *basso, alto, tenore*, etc.

In the names of musical instruments and of organ-stops it denotes a pitch of an octave below; as in CONTRABASS; **contrafagotto**, the double bassoon, also an organ reed-stop of similar tone; **contra-bourdon, contra-gamba, contra-hautboy, contra-posaune**, names of organ-stops an octave lower than the ordinary *bourdon, gamba*, etc.; so **contra-octave**, the 16 ft. octave of the organ, or the corresponding octave on other instruments.

1877 STAINER *Organ* iii, Stops..Contra Hautboy..Contra Posaune..Contra Bourdon. **1880** *Grove's Dict. (In mod.It., a single consonant following *contra* is doubled, e.g. *contrabbando, contrabbasso, contrappunto, contrammina*, etc. In dealing with the words historically, the older 16-17th c. spelling, being that which came into contact with Eng., has been used.)

†**contra-acting**, *ppl. a. Obs.* [CONTRA- 1.] Acting in opposition: cf. COUNTERACT.

1915 A. My colleague Professor J. The words *contranatation* and *denatation* are also available to indicate the act or habit of migration against or with the current. **1920** *Rep. Dove Mar. The definition varies with logicians according to the form in which they state the contrapositive proposition. The quality of the proposition is changed in the one form, and remains unchanged in the other. With Boethius and the earlier logicians the quality remained unchanged. Cf. Boeth. *De Syll. Cat.* Wks. L. *contrāri-us* opposite, hostile, etc., f. *contrā* against: cf. *adversary* and see -ARY. The later OF. form *contraire* gave the variant CONTRAIR, long retained in the north. The original stress, after F. and L., was *con'trarie*, but the poets, from Chaucer to Spenser and Shakspere, use both *con'trary* and *'contrary* (the latter the more frequent in Shaks.); of *con'trāry*, many instances occur in 17th c. verse; it is the only pronunciation recognized by Bailey (died 1742), and it is still app. universal in dialect and uneducated speech, *esp.* in sense 3 b, which is now confined to these forms of speech and to the nursery. *'Contrary* was used by Milton and Pope, and is given by Johnson (though he retained *con'trarily*, *con'trariness*, *con'trariwise*) and in all later dictionaries.

Walker, 1791, says 'The accent is invariably placed on the first syllable by all correct speakers, and as constantly removed to the second by the illiterate and vulgar': where the words 'placed on' and 'removed to' should change places, but the usage described is that of the present day. Sometimes, however, dialectally, the sb. is made *'contrary*, while the adj. remains *con'trary*.]

contre-dance, ‖ -danse, contra-dance. [after F. *contre-danse*, It. and Sp. *contra danza*, all corruptions of the English word COUNTRY-DANCE, by the conversion of its first element into the F. *contre*, It., Sp. *contra* against, opposite.] A COUNTRY-DANCE; esp. a French country-dance.

The English country-dance was introduced into France during the Regency 1715–23, and thence passed into Italy and Spain; cf. Littré, s.v. *Contre-danse*[2], and Venuti, *Scoperte di Ercolano* (Rome 1748) 114 'I canti, i balli .. che a noi sono pervenuti con vocabolo Inglese di contraddanze, *Country Dances*, quasi invenzione degli Inglesi contadini'. The arrangement of the partners in a country-dance in two opposite lines of indefinite length easily suggested the perversion of *country* into *contre-*, *contra-* opposite. Littré's theory, that there was already in 17th c. a French *contre-danse* with which the English word was confused and ran together, is not tenable; no trace of the name has been found in French before its appearance as an adaptation of the English. But new dances of this type were subsequently brought out in France, and introduced into England with the Frenchified form of the name, which led some Englishmen to the erroneous notion that the French was the original and correct form, and the English a corruption of it. Thus a writer in the *Gentleman's Magazine* 1758, p. 174 said, 'As our dances in general come from France, so does the *country-dance*, which is a manifest corruption of the French *contre-danse*, where a number of persons placing themselves *opposite* one to another, begin a figure'. Partly under the influence of this erroneous notion as to the etymology, partly as a mere retention of the French form, *contra-dance*, *contre-dance* have been used, and *contre-danse* continued in use, esp. for a French or foreign dance of this type.

1803 FESSENDEN *Terrible Tractor.* 14 So fam'd Aldini, erst in France Led dead folks down a contra dance. 1830 'JUAN DE VEGA' [C. COCHRANE] *Jrnl. Tour* xix. Hence **con'ventically** *adv.*

1840 *New Monthly Mag.* LX. 321, 'I was reading my blessed bible'..said Tim, looking conventically.

conventicle (kən'vɛntɪk(ə)l). Also 4–5 -icule. [ad. L. *conventicul-um* assembly, meeting, association, also place of assembly; in form dim. of *conventus* assembly, meeting, but not having in cl. L. any diminutive or depreciatory sense.

It was applied, app. by the Roman Christians themselves, to their meeting-houses, or places of worship, and is so used in the edict of Galerius, A.D. 311, permitting them to be rebuilt. In med.L. the word began to receive a derisive or contemptuous, and hence bad sense; according to Du Cange 'de hæreticis proprie dicitur'. The 4th Council of Carthage has 'conventicula hereticorum non ecclesia sed conciliabula appellantur' (Du Cange), where, however, the word itself is merely = 'assembly', or 'little assembly'; but assemblies of separatists, heretics, or reformers, being usually small and private, in comparison with the great public assemblies of the popular church, were naturally designated by the diminutive form, which gradually acquired from this association an unfavourable connotation. In English, the word has been used in the good or neutral sense received from ancient Latin; also, in the opprobrious sense in reference to private or clandestine meetings, first of a civil or political, and afterwards of a religious character. Although the ecclesiastical application arose directly out of the political, and was never thoroughly distinct from it in English Law, it was in common use largely affected also by the mediæval association with meetings of sectaries or heretics. Cf. F. *conventicule*, 16th c. in Littré, 'prohibition des conventicules [pour le protestantisme]'. In all the early verse quotations, from Shakspere, Beaumont and Fletcher,

Daniel, Crowne, Butler, Dryden, etc., it is accented ˌconven'ticle or 'conven,ticle (riming in *Hudibras* III. ii. 1388 with 'stickle'); Bailey's folio, 1730–6, accents *'conventicle*; and Cowper, *Task* II. 437, originally wrote 'the nasal twang, At 'conven,ticle heard', but altered it in ed. 3 (1787) to 'Heard at con'venticle'.]

b. *spec.* in *Eng. Hist.* A meeting of (Protestant) Nonconformists or Dissenters from the Church of England for religious worship, during the period when such meetings were prohibited by the law.

This specific application gradually became distinct after 1593, and may be said to have been recognized by the 'Conventicle Act' of 1664; for although the word there occurs in constant conjunction with *assembly* and *meeting*, and always with qualification, it was entitled 'An Act to prevent and suppress seditious conventicles', by which title it is cited in the Act of Toleration of 1689. The application to Nonconformist worship after its legalization or 'establishment' in 1689, and esp. after the repeal of the Conventicle Act in 1812, comes, according to circumstances, from a historical survival of the idea of illegality or from a living idea of schism or heresy.

There is a convocation of each of the provinces, Canterbury and York. It was convoked originally in the time of Edward I, at the same time as the lay Parliament, for the purpose of self-taxation, but it gradually assumed synodical powers. In Ireland a convocation, supposed to be the first, formed by a union of the four provincial synods, met in Dublin in 1615; after the disestablishment of the Irish Church, it was superseded by the General Synod of the Church of Ireland, composed of both clergy and laity.

convyne, obs. Sc. f. covin.

conwoy, obs. Sc. f. convoy.

cony, coney ('kəʊnɪ, 'kʌnɪ), *sb.* Pl. conies (coneys). Forms: α. 2 cunin, 3 konyng, 4-5 conyng(e, 5 conninge, -ynge, konyne, 5-6 cunning, cunyng, -ing; β. 2 cunig, 4 conig, 5 connyg; γ. 6-7 conie, conye, connie, -ye, conny, conney, cunnie, cunney, 6-8 cunny, 4- cony, 6- coney. [The current form represents OF. *conil, connil*, cogn. w. Pr. *conil*, Sp. *conejo*, Pg. *coelho*, It. *coneglio*:—L. *cunīcul-us* rabbit (also burrow, underground passage, military mine), according

to ancient authors a word of Spanish origin. The OF. pl. (with *l* suppressed) *coniz*, later *conis*, gave an Eng. pl. *conys*, *conies*, and this a singular *cony*, *conie*. The ME. *cunin*, *konyne*, *conyng* was a. OF. *conin*, *connin*, Anglo-Fr. *coning*, a parallel form to *conil*, which gave also MDu. *conijn*, Du. *konijn*, and, with *a* for *o*, LG. *kanîn*, whence mod.G. dim. *kaninchen*. In Eng. the form *cunyng*, *cunning* came down to the 16th c.; but from the 12th c. onward it varied also with *cunig*, *conig*, *connyg*. The historical pronunciation is with (ʌ); common spellings from 16th to 18th c. were *cunnie*, *cunney*, *cunny*, and the word regularly rimed with *honey*, *money*, as indicated also by the spelling *coney*; but during the 19th c. the pronunciation with long *ō* has gradually crept in.

This pronunciation is largely due to the obsolescence of the word in general use, while it occurred in the Bible, and esp. in the Psalms, as the name of a foreign animal (sense 3); the oral tradition being broken, readers guessed at the word from the spelling. It is possible, however, that the desire to avoid certain vulgar associations with the word in the *cunny* form, may have contributed to the preference for a different pronunciation in reading the Scriptures. Walker knew only the *cunny* pronunciation; Smart (1836) says 'it is familiarly pronounced *cunny*', but *cōny* is 'proper for solemn reading'. The obsolescence of the word is also a cause of the unfixed spelling; the Bible of 1611 has *conie*, *cony*, *conies*, modern editions *coney*, *conies* (cf. *money*, *monies*), an irregularity retained in the Revision of 1885.

The rabbit is evidently of late introduction into Britain and Northern Europe: it has no native name in Celtic or Teutonic, and there is no mention of it in England before the Norman period; in the quotations the fur, perhaps imported, appears before the animal. The Welsh *cwning*, *cwningen*, is from ME.; the Irish *coinnin*, and Gaelic *coinean*, *coinein* from ME. or AFr.]

Only rarely was the true composition asserted, as in the *cony-rie*, *cunnerye* of Levins. coolie, cooly ('ku:lɪ). Forms: 6 *pl.* colles, 7 collee, (cowler), 7–8 coulee, -ie, coly, 7–9 coolee, 8 couley, 8–9 cooley, 7- coolie, cooly. [Now found (in sense 2) in the Indian vernaculars generally: Urdū *qulī*, *qūlī*, Bengālī *kūlī*, Tamil, Telugu, Canarese, Malayālam, *kūli*; of disputed origin.

By some considered to be originally Tamil, and identical with the word *kūli* 'hire, payment for occasional menial work', whence (either by metonymy, or as short for *kūli-kāram* 'hire-man', *kūliyāl*, 'hire-person') *kūli* 'hireling, labourer, man who does odd jobs'. The objection to this is that the first known mention of Coolies early in the 17th c. refers not to the Tamil country, in the south, but to the region of Guzerat, in the west of India. On this account there is reason to think the word identical with *Kulī* or *Kolī*, the name of an aboriginal tribe of Guzerat (see sense 1), which is actually found spelt *Koulli*, *Coolie* in the middle of the 17th. c.

(The Kulīs of Guzerat were well known to the Portuguese in the 16th c.; and these probably carried the name both to Southern India and to China (cf. 1745 in 2). It is probable that the similarity between *Kulī* and the Tamil word *kūli* 'hire' may have led to the use of *coolie* in Southern India in the sense of *kūli-kāram* or *kuliyāl*.)]

†1. A variant of *Kulī* or *Kolī*, name of a numerous aboriginal tribe of Guzerat, formerly noted as robbers, but now settling down as respectable labourers and cultivators. *Obs.*

As to the phonetic history, the vowel of OE. *cumb* was app. lengthened before *mb* as in *comb*, *climb*, *clomb*, with similar loss of *b*, and the *ū* sound preserved in modern Eng. instead of being diphthongized, as in OE. *rúm*, ME. *roum*, mod. ROOM. Cf. also COOP.]

coomb[2]**, combe, comb** (ku:m). Forms: 1 cumb, (? 3 comb), 6 coome, 6– coombe, combe, 7– comb, 8– coomb, (9 coom). [In OE., *cumb* masc. 'small valley, hollow' occurs in the charters, in the descriptions of local boundaries in the south of England; also in numerous place-names which still exist, as *Batancumb* Batcombe, *Brancescumb* Branscombe, *Eastcumb* Eastcomb, *Sealtcumb* Salcombe, *Wincelcumb* Winchcombe, etc. As a separate word it is not known in ME. literature, but has survived in local use, in which it is quite common in the south of England: see sense b. In literature *coomb* appears in the second half of the 16th c., probably introduced from local use; a century later, it was still treated by Ray as a local southern word. OE. *cumb* is usually supposed to be of British origin: modern Welsh has *cwm* (kum) in the same sense, also in composition in place-names as *-cwm*, *-gwm*, and in syntactic combination as *Cwm Bochlwyd*. A large number of place-names beginning with *Cum-*, especially frequent in Cumberland, Dumfriesshire, and Strathclyde, as *Cumwhitton*, *Cumdivock*, *Cumlongan*, *Cumloden*, appear to be thus formed. Welsh *cwm* represents an earlier *cumb*, OCeltic **kumbos*. The OE. word might however be an obvious application of *cumb*, COOMB[1], to a physical feature, though there is no trace of any such application of the cognate German words on the Continent; in any case, if the Saxons and Angles found a British *cumb* applied to a hollow in the ground, its coincidence with their own word for 'basin, bowl, deep vessel' would evidently favour its acceptance and common use. This might further be strengthened, after the Norman Conquest, by the existence of a F. *combe* 'petite vallée, pli de terrain, lieu bas entouré de collines' (Littré, 12th c.), cognate with Pr., Sp. and north It. *comba*, for which also a Celtic origin has been claimed. See Diez, Thurneysen, Littré. The phonetic history is the same as in COOMB[1]; in composition (in names of old formation) (-ku:m) has sunk to (-kəm).]

c. In the south of Scotland and in the English Lake district, '[in] such hills as are scooped out on one side in form of a crescent, the bosom of the hill, or that portion which lies within the lunated verge, is always denominated the coomb'. (Hogg *Queen's Wake* 1813 *Notes* xxiv.)

That the word is native in Scotland is doubtful: Jamieson's Dictionary knows nothing of it beyond Hogg's assertion, and it is not in common use. But in Cumberland

it appears in some local names, as *Gillercombe*, the great hollow above Sour Milk Gill in Borrowdale, and as a separate word in *Glaramara Combe*, *Langdale Combe*.

coon-can ('ku:n'kæn). Also **cooncan, kuhn-kan; conquian** ('kɒŋkɪən). [ad. Sp. *con quién* with whom?] A game of cards, originating in Mexico, the main object of which is to secure sequences.

Each player receives (usually) ten cards, and the aim is to form sequences of the same suit or sets of three or four cards of the same denomination. One card is placed face upwards and the rest of the cards face downwards, each player in turn taking either the exposed card or the top card of the pack, afterwards discarding any card in his hand. The player gets rid of his cards by declaring them when he has made a complete set or sets, and the winner is the one who first gets rid of all his cards.

[mod.E. *coop*, in 15–17th c. *cowpe*, *coupe*, is app. identical with ME. *cupe*, *coupe* basket, pointing to an OE. **cúpe* fem., an unrecorded collateral form of *cýpe* cask, bushel, basket; app. = Du. *kuip*, MDu. *cûpe*, EFris. *kupe*, MLG. *kûpe*:—OLG.

The German words are generally considered to be a L. *cūpa*, in med.L. also *cōpa* 'cask'; but if this be their origin, it is difficult to account for the umlaut in OE. *cýpe*, KIPE.

When *cupe*, *coupe* appears in ME., it is a synonym of *kype*, *kipe*, 'basket'; in sense 3 also *coop* and *kipe* are still synonymous. Sense 2 is not found in *kipe*, though a natural enough development of the sense 'basket'.

The phonetic development *cúpe*, *coupe*, *coop*, is paralleled by *stúpian*, *stoupe*, *stoop*, and ON. *drúpa*, *droupe*, *droop*, where also the sound (u:) is retained, instead of being, as usual, dipthongized to (aŭ) in mod.Eng., and the spelling is assimilated to that of words in *oo* from OE. *ó*, ME. *ō*.]

†**1.** (ME. *cupe*, *coupe*, pl. *-en*.) A basket. *Obs.*

[From the ambiguity of ME. *u*, it is possible that in some of these *u* means *ü* = *y*, and that they are examples of *kype*, KIPE; but the spelling *coupe* of the later text of *Floriz* must belong here.]

2. *Pol. Econ.* The combination of a number of persons, or of a community, for purposes of economic production or distribution, so as to save, for the benefit of the whole body of producers or customers, that which otherwise becomes the profit of the individual capitalist.

For the history of the term see the quotations. As originally used by Owen the name contemplated the co-operation of the whole community for all economic purposes, i.e. communism. In practice, the principle has been carried out in *production,* when a body of workmen corporately own the capital by which their concern is carried on, and thus unite within themselves the interests of capital and labour, of employer and employed; and in *distribution,* when an association of purchasers contribute the capital of a store by which they are supplied with goods, and thus combine in themselves thc interests of trader and customers. See CO-OPERATIVE.

co-operative society: a society or union of persons for the production or distribution of goods, in which the profits are shared by all the contributing members.

co-operative store: a store or shop belonging to and supported by a co-operative society, with the purpose of supplying themselves with goods at a moderate price, and of distributing the profits, if any, among the members and regular purchasers.

(The earliest co-operative societies and stores were established as a first step towards the contemplated communistic organization of society, mentioned under CO-OPERATION. But the primary aim was gradually lost sight of, and in 1844 the principle was introduced of giving the profits not to the owners of the business, but, partly at least, to the customers.)

B. *sb.*

1. One who or that which is co-ordinate, or of the same rank; an equal; a co-ordinate element.

2. *Math.* a. Each of a system of two or more magnitudes used to define the position of a point, line, or plane, by reference to a fixed system of lines, points, etc. (Usually in *pl.*)

In the original (and most often used) system, invented by Descartes, and hence known as that of ***Cartesian co-ordinates***, the co-ordinates of a point (in a plane) are its distances from two fixed intersecting straight lines (the *axes of co-ordinates*), the distance from each axis being measured in a direction parallel to the other axis. (The determination of the position of a place by *latitude* and *longitude* is a similar case.) The co-ordinates are *rectangular* when the axes are at right angles; otherwise *oblique*. The name *Cartesian co-ordinates* is also extended to the case of points *in space* (not in a particular plane) referred to *three* axes not in one plane intersecting in a point (like three edges of a box meeting at one corner).

Hence applied to various other systems, mostly named from the nature of the fixed figure, etc., to which the points are referred; as ***bipunctual co-ordinates***, co-ordinates defining a line or point by reference to two fixed points and a fixed direction. ***polar co-ordinates***, co-ordinates defining a point (in a plane) by reference to a fixed line (*initial line* or

axis) and a fixed point (*origin* or *pole*) in that line; the co-ordinates of any point being the length of the straight line (*radius vector*) drawn to it from the pole, and the angle which this line makes with the axis (as in defining the position of a place by its *distance* and *bearing* from a given place). The name *polar co-ordinates* is also applied to an extension of this system to points in space. So *bicircular co-ordinates*, *bilinear* c., *trilinear* c., etc.

Med.L. had both *coppa* and *cuppa*; cf. It. *coppa*, Pr. *copa*, F. *coupe*: the relations between the Teutonic and Romanic words are difficult to determine.

Copp and *cuppe* apparently came down into ME. as distinct words; but ME. had also *coppe*, app. a mixture of the two, or a northern form of *cuppe*, CUP, assimilated to *copp*. It is not possible to separate the plural of *copp* from that of *coppe*, and the examples of *coppes* have consequently been all considered under CUP; but it is possible that some of them belong here.]

cop (kɒp), *sb.*[2] Forms: 1– cop, 3–7 coppe, (7 cops). [OE. *cop*, *copp* top, summit; generally thought to be identical with prec., since in MDu. *cop* developed (after 12th c.) the sense 'skull' and then 'head', and *kopf* was in MHG. 'cup', in mod.Ger. 'head'. Cf. also the analogy of L. *testa* pot, shell, skull, It. *testa*, F. *tête* head. But in OE. the sense 'skull' or even 'head' is not known, only that of 'top, summit', which hardly runs parallel with the words in the other langs., besides being so much earlier. It is possible that the two words are distinct or only related farther back.

(One might suppose that *kop(p)* top, was the native OE. word, and *copp* of the Northumbrian Gospels a. ON. *kopp'r*: but the whole subject of the history and origin of these words in Teut. is very obscure: see Kluge, and Franck, also CUP.) There was also an OF. *coppe*, summit (cf. Usually spelt *cooper* in the newspapers 1881-84, but pronounced *coper* by the fishermen, and so spelt in the publications of the Mission to Deep Sea Fishermen. In the memory of old smacksmen of Grimsby (as stated by Mr. J. F. Wintringham) the name goes back to 1854, when Flemish and Dutch *koopers* first began to frequent the fleets.]

A vessel fitted out to supply ardent spirits, etc. usually in exchange for fish, to the deep-sea fishers in the North Sea; a floating grog-shop.

The practice began in a comparatively innocent barter trade carried on by Dutch boats visiting the fishing fleets, when the latter fished in close to the land, off Camperdown and the Texel; but it led to the fitting out of 'floating grog-shops' to attend each fleet. Public attention was called to the demoralizing nature of the traffic in 1881, and it formed the subject of a convention between the British, German and Dutch governments in 1882, for the carrying out of which an Act of Parliament was passed in 1888.

copperas ('kɒpərəs). Forms: 5-7 coperose, (5 coperosse, coporose, copros(se, 6 coperus, cop(p)erous(e, coporouse, (copper(r)oost(e), copporose), 6-7 coperas, cop(p)eress(e, -is, -ose, cop(p)oras, -es, -is, cop(p)ras, -es(se, 7 cop(p)erase, -ass, -ice, cop(p)ris, -ice, -ose, 6- copperas. [In 15th c. *coperose*: cf. F. *couperose* (14th c. in Littré), *coupperose*, It. *copparosa*, med.L. *cuperosa*, *cuprosa*, *coporosa*, in various early glossaries: see *esp.* Grimm, s.v. *Kupferrose*.

Diez explained *cuperosa*, as = **cupri rosa* rose of copper, comparing the Gr. name *χάλκανθον*, *-os* lit. 'flower of copper.' It seems more probable that med.L. *cuprosa*, *cuperosa* was simply short for **aqua cuprosa* = Ger. *kupferwasser*, Du. *koperwater*, and its association with *rosa* 'rose' merely an etymological fancy. That it was so understood is certain: cf. Kilian (Flemish 1599) '*Koper-roose*, *Koperwater*, chalcantum, vitriolum, *vulgo cuperosa* and *coppa rosa*'; and obs. Ger. *kupferrose* = *kupferwasser* (Henisch); also mod. Du. *koperrood* copper-red, obs. Ger. *kupferroth*, LG. *koperrôt*. See the many forms in German under *kupferrauch*, *-rose*, *-roth*, *rusz*, *-wasser*, in Grimm. In F., *couperose* is also applied with more descriptive propriety to the disease *copper nose*; so in Ger. 'eine kupferrote nase' (Grimm).]

1. A name given from early times to the protosulphates of copper, iron, and zinc (distinguished as *blue*, *green*, and *white* copperas respectively); etymologically it belonged properly to the copper salt; but in English use, when undistinguished by attribute or context, it has always been most commonly, and is now exclusively, applied to *green* copperas, the proto-sulphate of iron or ferrous sulphate (Fe SO_4), also called *green vitriol*, used in dyeing, tanning, and making ink.

(The extension of the name beyond its etymological meaning is anterior to its appearance in English, and indeed inherited from Gr. *χάλκανθον*, the description of which by Dioscorides gives prominence to *blue* vitriol, while its use as shoemaker's ink implies *green* vitriol; the same is true of Pliny's account of *chalcanthum*. It is probably that, at all times, the occurrence of composite salts containing a variable proportion of copper and iron, as well as the failure to distinguish between copper and iron pyrites, contributed to the confusion. It has to be remembered also that from the mediæval point of view 'copperas' was a *species*, occurring in various colours, the difference of composition being only vaguely apprehended, and that the phenomenon of the dissolving of iron by a solution of green copperas, with deposition of its copper, was explained as conversion of iron into copper by the mediation of the 'copperas', which changed its colour from blue to green in the process.)

1. A hard calcareous substance consisting of the continuous skeleton secreted by many tribes of marine cœlenterate polyps for their support and habitation. Found, according to the habits of the species, in single specimens growing plant-like on the sea-bottom, or in extensive accumulations, sometimes many miles in extent, called *coral-reefs*.

a. Historically, and in earlier literature and folk-lore, the name belongs to the beautiful *red coral*, an arborescent species, found in the Red Sea and Mediterranean, prized from times of antiquity for ornamental purposes, and often classed among precious stones. *pink coral*: a pale variety of this.

b. Afterwards extended to other kinds; at first named from their colour, as **white coral**, originally applied to Madrepore, **black coral** (*Antipathes*), **blue coral** (*Heliospora*), **yellow coral**, etc. In more recent times, many kinds have been named from the appearance of the aggregate skeleton, as **brain c.** (*Meandrina*), **cup c.** (family *Cyathophyllidæ*), **mushroom c.** (*Fungia*), **organ-pipe c.** (*Tubipora*), **star c.** (*Astroides*), etc. See also madrepore, millepore.

III. ii. 87 The Black Coral is distinguished from the Red by the horny nature of the stem, and by its flexibility and smoothness. White Coral differs still more. The axis is stony or calcareous; but the polyps are contained in lamellated star-like cavities, and not in the fleshy cortical substance.

2. (with *a* and *pl.*) a. A particular species of the preceding, or of the colonial zoophyte of which it is the skeleton; also, a single polypary or polypidom in its natural condition (= corallum).

The coralligenous zoophytes belong to the two classes *Anthozoa* (or *Actinozoa*) and *Hydrozoa* of the Cœlenterata (q.v.). Both these classes contain families of compound, aggregate, or colonial zoophytes, secreting a continuous calcareous skeleton, which goes on growing by the constant development of new polyps or individual animals, each, like the bud of a plant, springing from and connected with the common stock. The Anthozoa are usually subdivided into two sub-classes, *Alcyonaria* (= *Octactiniæ*), to the colonial families of which belong the Red, Blue, and Organ-pipe corals; and *Zoantharia* (= *Hexacoralla*), of which the division *Antipatharia* contains Black coral, and *Madreporaria* the Madrepores, Brain-corals, Mushroom-corals, Star-corals, etc., the chief reef-building corals. To the class *Hydrozoa* belong the *Millepores*, which are only distantly related to the other coralligenous animals, though their calcareous skeletons also form extensive reefs.

1579 T. Stevens in Hakluyt *Voy.* (1589) 161 One of them pulled vp a currall of great bignesse and price. Prob. first given to the calcareous sea-weed *Corallina officinalis* (sense 1 below); but also including the compound animal organisms of plant-like habit growing in the sea, then thought to be plants. When the animal nature of coral was recognized, the corallines (including *Corallina*) were transferred to the animal kingdom. More accurate knowledge has since separated senses 1 and 2. The animal 'corallines' have moreover been found to belong to entirely distinct zoological divisions, some of them (*Polyzoa*) being Cœlomata, others (*Hydrozoa*) being Cœlenterata; hence the name is no longer a term of Zoology, though retained in popular use, as in 'a collection of sea-weeds and corallines'.

The architectural application of the term began in Fr., in which there are other senses transferred from that of raven or raven's beak. Hatzfeld, *Dict. Général*, says that the architectural corbel was originally cut slantwise (taillé en biseau), so that its profile would be beak-like. (The assumption in some English dictionaries that *corbel* is to be identified with F. *corbeille* a basket, is entirely erroneous.)]

2. *Arch.* A projection of stone, brick, timber, iron, or other constructional material, jutting out from (not merely attached to) the face of a wall, to support a superincumbent weight.

As defined by the French architects, a corbel has parallel sides perpendicular to the surface of the wall, and must project farther than its own height. (Cf. CONSOLE.)

Some English writers use the term more loosely, so as to include e.g. the tapering projection sustaining the ribs of a vault called by the French *culot* or *cul de lampe*, and specially excluded by Viollet-le-Duc and Bosc from their definition of *corbeau*.

In English, the term appears to have been purely technical, until caught up by Sir Walter Scott; his 'corbels carved grotesque and grim' have taken hold of the popular fancy, and associated the word with the notion of grotesque ornamentation; but a corbel is not an ornament, nor does ornamentation enter into its essential character.

These names have app. no literary history, and are evidently popular designations, meaning steps such as only a perching or climbing animal, like a crow or cat, could get at or use. Jamieson, however, offered the conjecture that *corbie-steps* might be a corruption of 'corbel-steps' (of the existence of which he had no evidence whatever), and this merely fictitious form has been adopted in some Dictionaries, etc.]

core (kɔə(r)), *sb.*[1] Forms: 4- core; also 4-5 coore, 5-7 coare, (7 chore, choare, kore, quore), 7-8 coar. [Appears *c* 1400, in senses 1, 2; *core* has been the prevailing spelling from the first. Etymology uncertain.

Minsheu conjectured 'perhaps it hath its name from L. *cor* the heart, because it lieth in the middle of the fruit'. Skinner pronounced it 'from F. *cœur*, It. *cuore*, L. *cor*', which has been repeated by most etymologists since. But the original meaning does not agree with any sense of the L. *cor* or Fr. *cœur*, and it was not app. till late in the 16th c. that any one thought of associating it with the notion of 'heart'. Moreover the OF. word was *cuer*, which in the end of 14th c. gave place to *cueur*, latinized after the Renascence to *coeur*, *cœur*. Other conjectures are that it represents F. *corps* (OF. also *cors*) body, or *cor* horn. Some support is given to the last by sense 3 (see esp. quot. 1580); but the persistent final *e* of the Eng. word is a great obstacle to any such derivation. The primary sense of *core* had formerly been expressed by COLK.]

1849 *Specif. A. Smith's Patent* No. 12620. 2 A reel or bobbin from which the heart or core for the rope..is supplied. **1852** *Mech. Mag.* LVII. 392 R. S. Newall was the inventor of wire ropes containing a core of hemp..the application of this invention to electric telegraph rope is most obvious, for it is simply the substitution for the core of hemp of the core of gutta percha containing the electric wires. **1892** *Sat. Rev.* 27 Feb. 253 (*Subm. Teleg.*) It was for twenty-five knots of what electricians now call core—namely, copper wire insulated by a covering of gutta percha. In modern cables the core is always protected first by a serving of hemp or jute, and then by an outer sheath of soft steel wires.

IV. The central or innermost part, the 'heart' of anything.

In some of these uses 'heart' is of much earlier occurrence; e.g. *in heovene hert c* 1300; *the herte of Fraunce*, Palsgr. 1530; *hert of Oke*, Fitzherbert 1525. The employment of *core* in similar senses appears to have come from the etymological notion of identifying it with L. *cor*, and thus with *heart*.

12. *Geol.* and *Astr.* The differentiated central part of a planet; *spec.* that of the earth, differing from the mantle and the crust in composition, density, and temperature and believed to be divided into a liquid inner and a solid outer core.

1882 A. GEIKIE *Text-bk. Geol.* 50 He found that the precessional and nutational movements could not possibly be as they are if the planet consisted of a central core of molten rock surrounded with a crust of twenty or thirty miles in thickness. **1940**, etc. [see MANTLE *sb.* 11]. **1978** PASACHOFF & KUTNER *University Astron.* xiv. 396 Most scientists believe that the Moon's core is molten. **1984** A. Coriolis (kɒrɪˈəʊlɪs). The name of G. G. *Coriolis* (1792–1843), French engineer and mathematician, used chiefly *attrib.*, to designate the effect whereby a body moving relative to a rotating frame of reference is accelerated in that frame in a direction perpendicular both to its direction of motion and to the axis of rotation of the frame.

cork (kɔːk), *sb.*[1] [Cf. Sp. *corcha, corche* in same sense; but 15th c. *corke*, with 16th c. Du. *kork, kurk*, Ger. *kork*, appears to represent OSp. *alcorque* 'a corke shooe, a pantofle' (Minsheu), in which sense *corke* is cited in 1463 (sense 2); cf. also Ger. *korke* slipper (1595 in Grimm), and the earliest High G. name for cork, *pantoffel-* or *pantofflenholz* slipper-wood.

The Sp. *corche* represents (directly or indirectly) L. *corticem* bark (in which sense Sp. now uses *corteza*:—L. *corticea*). *Alcorque*, known in Sp. of date 1458, was immediately from Sp. Arabic (Covarrubias 1611 has 'dicho en Arabigo *corque*'); but its origin is uncertain; Dozy thinks it represents L. *quercus*. If this be so, then *corque*, and by implication *cork*, has no connexion with Sp. *corcha, corche*, or L. *cortex*.]

As a general term the word includes all the cereals, wheat, rye, barley, oats, maize, rice, etc., and, with qualification (as *black corn*, *pulse corn*), is extended to leguminous plants, as pease, beans, etc., cultivated for food. Locally, the word, when not otherwise qualified, is often understood to denote that kind of cereal which is the leading crop of the district; hence in the greater part of England 'corn' is = *wheat*, in North Britain and Ireland = *oats*; in the U.S. the word, as short for *Indian corn*, is restricted to *maize* (see 5).

cornel[3] ('kɔːnəl). Also 6-7 -ell, -eill, -eil(e, 7 -ill, -oil(e, cornowlee. [App. first in 16th c. herbalists, in the compounds *cornel tree*, *cornel berry*, transl. Ger. *cornel-*, *cornell-baum* (16th c. in Grimm), *kornel-beere*, app.:—OHG. *cornulbaum*, *-beri*, *churnelbere*, *quirnilberi*. According to Hildebrand, Kluge, etc., OHG. *cornul*, *curnol* was ad. med.L. *cornolium* (or ? *cornolius*) cornel-tree (in Du Cange). This med.L. seems to be formed on F. *cornouille* (in 16th c. *cornoille*, *cornoaille*) 'cornel-cherry', which Diez refers to a pop. L. **cornuculum* (in pl. *-a*), dim. of L. *cornum* 'cornel-cherry', the fruit of the *cornus* or cornel-tree.

The Ger. *kornelbaum* is also the source of Da. *korneltræ*, Sw. *kornelträd*. Mod.Ger. has *kornelle* for the fruit. From F. *cornouille* is derived Du. *kornoelje*, whence Brereton's *cornowlee* (quot. 1634). Variously formed derivatives of L. *cornus*, *cornum*, and the adj. *corneus*, appear in CORN-TREE, OE. *corntreow*, and It. *cornio*, *corniolo* the tree, *cornia*, *corniola* the fruit (cf. Picard dial. *corgnolle*, *corniolle*), obs. F. *cornille* the berry (Cotgr.), Sp. *cornejo* (:—*corniculus*), F. *cornier*, *cornouillier*, cornel-tree.]

1. English name of the botanical genus *Cornus*, of which the ancient writers and early herbalists distinguished two 'sorts', *Cornus mas* 'male cornel', and *C. femina* 'female cornel'. The former was the *cornel-tree* (see 3 a) or cornelian cherry-tree, the *tame cornel* of Lyte (*C. mascula*), a large shrub or low tree bearing edible fruit, a native of Southern Europe, sometimes cultivated in Britain; the latter was the *cornel-bush*, *wild* or *common cornel*, or dogwood (*C. sanguinea*), a common hedge-row shrub in the south of England, of which the berries are not edible. *dwarf cornel* is a modern book-name of *C. suecica*, and in N. America of *C. canadensis*. With other qualifying words the name is sometimes given to other species of *Cornus*, of which more than twenty are known.

See also CARNELIAN. [Refashioned in the termination from ME. *corneline*, a. 15th c. F. *corneline* (now *cornaline*) = Pr., OSp., and Pg. *cornelina*, Sp. *cornerina*, It. *cornalina* (in Florio *cornelino*). The med.L. name was *corneolus*, common in writers *de Nat. Diez referred the name to L. *cornu* horn (cf. esp. L. *corneolus* horn-like, dim. of *corneus* of horn, horny), 'because the colour is (sometimes) like that of the finger-nail', comparing ONYX, Gr. *ὄνυξ* nail. But grave objections to this are pointed out by Schade, who thinks the stone had its name from its likeness in colour to the Cornel-berry or Cornelian-cherry, L. *cornum*, adj. *corneus*; in It. *corniola* was both the fruit and the stone.

Late in the 15th c. the L. *corneolus* was perverted to *carneolus*, after *carnem* flesh, *carneus* flesh-coloured; thence an occas. MHG. *carneôl*, and the Eng. by-form CARNELIAN.]

cornice ('kɔ:nɪs), *sb.* Forms: 6- cornice, 7 cornishe, corniche (coronix), 6–8 coronice, 6 coronich (cornix), 6–9 cornish. [The forms *cornice*, *cornishe*, were taken immed. from F. and It. equivalents: cf. 16th c. F. *cornice*, *cornise*, in Cotgr. *cornice*, *corniche* 'the cornish or brow of a piller or wall', mod.F. *corniche*; ad. It. *cornice* (kor'nitʃe) 'the ledge whereon they hang tapistrie in any roome; also an out-jetting peece or part of a house or wall' (Florio); *cornice* represents the It. spelling; F. *corniche*, Eng. *cornish* derive from It. pronunciation. The variants *coronix*, *coronice*, are based on 16–17th c. latinized forms.

It. *cornice*, the source of the word in all the mod. langs., is known from the beginning of Italian literature, being frequent in Dante. In form it is identical with *cornice*:—L. *cornix*, *-īcem* crow (*Corvus Cornix*), and by Florio it is treated as the same word; in the *Vocabolario della Crusca* the two are separated. The L. term for the architectural cornice was *corōna* (Vitruvius), and some have conjectured that the It. *cornice* is in some way derived or corrupted from that word, the form *coronix* cited by Du Cange, and used in Eng. by Shute in 1563, being assumed to be a connecting link. But there is no evidence for L. *coronix* before 16th c. Du Cange's example is of 1643, his example of *cornix* of 1605; both appear to be merely latinized forms of the Italian word, *coronix* being contaminated by the desire to connect it with *corōna*. Another suggestion is that the It. *cornice* was in some way related to L. *corōnis*, *-idem* = Gk. *κορωνίς*, given in Hesychius in the sense *τὸ τελευταῖον τῆς οἰκοδομῆς ἐπίθεμα* 'the finishing piece placed on the building', the 'cope-stone'. But this could not have phonetically given It. *cornice*, unless indeed the Gk. word had passed into popular Italian use, and been assimilated by popular perversion to *cornice* crow. Of this we have no evidence.]
